Конденсированные среды и межфазные границы / Condensed Matter and Interphases. 2026, 28(3)

CONTENTS

Review

Khamaganova T. N., Subanakov A. K.
Crystal growth and optical properties of SrB_4O_7: a review 333

Shostak N. A.
Temperature ranges of hydrate formation and determination of thermobaric parameters for systems of individual gaseous and liquid hydrate formers: a review 350

Original articles

Kara N., Kiraci A., Yurtseven H.
Pressure-dependent linewidth and Grüneisen parameter calculated from the soft Raman mode in zirconia 363

Borshch N. A.
Search strategy for stable isomers of silicon clusters encapsulating certain fourth-period transition metals 376

Vasilkova E. I., Shubina K. Yu., Papylev D. S., Andryushkin V. V., Pirogov E. V., Gladyshev A. G., Novikov I. I., Karachinsky L. Ya., Sobolev M. S.
Noise figure reduction of a GaAs-based pHEMT transistor by optimization of the gate barrier layer thickness using numerical simulation 388

Domashevskaya E. P., Lenshin A. S., Polkovnikova Yu. A., Chernousova O. V., Frolova V. E., Zanin I. E.
Phase composition and molecular bonds of hybrid porous silicon nanostructures with precipitated cinnarizine 396

Panyutin E. A., Sharofidinov Sh. Sh.
Elastic stresses in bimorph piezocantilevers based on epitaxial wide-band III-nitrides 408

Petukhov M. I., Demin V. A.
Electrokinetic regimes of weakly conducting liquids under conditions of oxidation-reduction process 415

Savelyev M. S., Vasilevsky P. N., Otsupko E. P., Tolbin A. Yu., Gerasimenko A. Yu.
Study on the efficiency of laser radiation attenuation using a nickel phthalocyanine-based nanocomposite with cyclotriphosphazene substituent and single-walled carbon nanotubes 425

Sharlaev A. S., Berezina O. Ya., Volkov F. S., Eliseeva S. N.
Effect of the phase composition of cathode material based on vanadium oxide nanofibers on the electrochemical characteristics of a lithium-ion battery 436

Short communication

Brizhan K. V., Sarapulova V. V., Gulyaeva V. V., Pismenskaya N. D.
Low-reagent selective extraction of ammonia nitrogen from wastewater: optimization of the current mode of bipolar electrodialysis coupled with a liquid-liquid membrane contactor 444

Vũ Dương, A. Nguyễn Đức Hoàng, Đặng Nguyễn Uyên Phương
AI-enhanced multi-objective optimization of plasma-sprayed hybrid coatings for microsatellite shells 449

Turishchev S. Yu., Chuvenkova O. A., Titova S. S., Fateev K. A., Trebunskikh S. Yu., Chernonosova P. A., Kureshi D. Z., Salkov S. I., Kannykin S. V., Chumakov R. G., Shramkov E. A., Penskoy P. K., Lavlinskaya M. S., Sorokin A. V., Holyavka M. G.
Silicon in carboxymethylated rice husk: electron microscopy and photoelectron spectroscopy studies 457

Chronicle

In memory of Vladimir Andreevich Terekhov on the 80-th anniversary of his birth (September 20, 1946 – November 1, 2024) 465

In memory of Vladimir Pavlovich Zlomanov (April 16, 1934 – July 10, 2026) 469
